

LITHIUM BATTERY CHARGING STATION – DOUBLE

PRODUCT CODE: DIL55LI-170

DESCRIPTION

The pH7 Lithium Battery Charging Station is specifically designed for the safe charging of Li-Ion batteries. Packed full of smart features to keep batteries cool and provide early detection if a faulty battery catches fire.

Four adjustable shelves, each with a plug box containing 8 sockets, 32 in total.

Temperature and humidity monitoring is visible from the outside and an adjustable exhaust fan helps dissipate warm air. Smoke detector provides early warning in an emergency. External isolation switches allow you to disconnect power to the cabinet without opening the doors.

The product strictly follows the FM6050 standard fireproof structure design and meets the requirements of the American Occupational Safety and Health Association OSHA 1910.106 and the American Fire Protection Association NFPA 30 regulations.
